### Chapter 3 Unit Level Maintenance Management

#### 3-1. Maintenance managers

Unit level maintenance managers are those officers and noncommissioned officers that plan, organize, direct, coordinate, and control unit level maintenance assets. The most influential maintenance manager in a unit is the commander. However, most management tasks are accomplished by the motor officer/motor sergeant or maintenance team chief at company/troop/battery level. At battalion/

squadron level the maintenance officer/technician and motor sergeant are the key maintenance managers. Refer to figure 3-1 for unit maintenance hierarchy.

#### 3-2. Maintenance standards

To achieve the maintenance standards required by AR 750-1, chapter 1, which is the TM -10/20 PMCS standard, maintenance managers should focus on the following:

a. The unit commander's maintenance requirements for accomplishing the unit's tactical mission.

- b. Recommending equipment maintenance goals and objectives to the commander responsible for the maintenance of assigned equipment.
- c. Assisting the unit commander in the planning of operator/crew and unit mechanic equipment sustainment training.
- d. Managing resources such as, money, people, time, and materiel.
- e. Reporting accurate readiness.

- f. Recommending improvements to the Army Maintenance Management System.
- g. Evaluating the constant performance of functional areas of unit maintenance.
- h. Performing high quality TM -10/20 PMCS using the applicable equipment technical manuals.
- i. Integrating safety into all tasks associated with unit maintenance.
